2013 COLORADO SMALL HYDRO CONFERENCE

TUESDAY | JULY 23, 2013

Denver Convention Center
8:00 AM TO 7:00 PM

The COSHA conference is the one must-attend event each year for anyone interested in hydro development in Colorado. It brings together everyone in the Colorado hydro industry — including hydro developers, equipment vendors, utilities, environmental consultants, and federal, state and local government officials – as well as property owners interested in pursuing hydro development.

The 2013 COSHA conference includes presentations about new federal and state legislation related to small hydro, a new federal assessment of hydro development opportunities in Colorado and Colorado's new Small Hydro Handbook.

Panel discussions will cover hydro plant operations, hydro project financing and new small hydro projects currently being developed in Colorado.

John Salazar, Commissioner of the Colorado Department of Agriculture, will provide the luncheon keynote address.

The 2013 COSHA conference will highlight progress made over the past year in developing small hydro in Colorado and provide perspective on what's ahead for the future.

REGISTRATION FEE $130

Includes the COSHA conference, coffee breaks, lunch, and entrance to the HydroVision International Conference Opening Plenary Session and Exhibit Hall.
